POLO YANO

Rollator walker with YANO forearm support

Ideal rollator walker for those with limited hand, arm and wrist strength.

Height, angle and depth adjustable forearm supports achieve optimal center of gravity for improved balance and weight redistribution. 3 handle types are included to the right support.

Polo Yano forearm walker has a lightweight, aluminum frame that is easy to maneuver but doesn't sacrifice durability with a weight capacity.

Ideal for those with limited hand, arm and wrist strength.

- Lightweight aluminum frame for durable maneuverability.
- Padded forearm rests and ergonomically shaped handles for optimal comfort
- Dual-action hand brakes for speed control at your fingertips.
- Height-adjustable armrests to suit your comfort and support needs.
- Foldable frame for compact storage and convenient portability.
